JUBART DATA

Weekly Report

#Week 18

National Fish Observatory

INTRODUCTION

Week 18 (April 21 to May 3, 2026) showed a fish market still adjusting in Brazilian retail. tilapia, salmon, and cod displayed different movements, with stability in some product formats, selective price recovery in others, and relevant regional differences.

The main signal of the week lies in the regional interpretation of prices. Rather than a homogeneous trend, the data indicate distinct strategies and pressures depending on species, product format, and the location of the monitored stores.

Salmon

Salmon showed mixed behavior in Week 18. Frozen fillets declined slightly (-1.05%), while fresh fillets remained virtually stable. Whole formats recorded a price recovery: frozen whole salmon increased by 3.64%, and fresh whole salmon rose by 10.57%.

This movement suggests a targeted adjustment in product formats that are more sensitive to availability, sales turnover, and retail promotional strategies.

Table 1. Price Indicators – Whole and Filleted Salmon.

Presentation	Preservation	Current Week Price	P25 -P75	% Change vs. Previous Week
Whole	Frozen	R$56.99	R$54.99 - R$63.90	3.64
	Fresh	R$67.99	R$64.44 - R$69.99	10.57
Fillet	Frozen	R$119.98	R$112.44 - R$139.98	-1.05
	Fresh	R$104.99	R$89.90 - R$189.90	0.09

In the regional analysis of fresh fillets, the highest price level was observed in the North, while the lowest was recorded in the South. This range reinforces the regional differences in salmon positioning within the Brazilian retail market.

Table 2. Median price and regional variation of salmon fillet.

Region	Current Week Price	% Change vs. Previous Week
North	R$136.79	0
Northeast	R$129.98	-0.96
Central-West	R$133.73	-1.79
Southeast	R$119.80	0
South	R$108.98	0

Cod

Cod showed an increase in the monitored base, with 6,034 samples an advance of 10.37% compared to the previous week. The number of stores also grew, reaching 388, indicating a stronger presence of the category in retail even after the peak period of Easter.
For loins, the highlight was Pacific cod, with a weekly increase of 7.15%. In the split (butterflied) format, prices were more stable. The category remains highly segmented by species, cut, presentation, and region, requiring a more granular analysis rather than relying on a simple national average.

Table 3. Price Indicators – Cod Loin and Split Cod.

Presentation	Preservation	Current Week Price	P25 -P75	% Change vs. Previous Week
Loin	Saithe - *Pollachius virens*	R$114.49	R$ 96.74 - R$ 132.24	0
	Cod (Generic)	R$181.24	R$158.86 - R$192.40	0.81
	Gadus morhua	R$231.24	R$224.88 - R$243.74	0
	Pacific Cod - *Gadus macrocephalus*	R$299.90	R$299.90	7.15
Split	Saithe - *Pollachius virens*	R$59.99	R$59.99 - R$62.99	0
	Zarbo - *Brosme brosme*	R$79.90	R$79.90	0
	Pacific Cod - *Gadus macrocephalus*	R$84.89	R$84.89	0
	Ling - *Molva molva*	R$99.90	R$99.90	0
	Cod (Generic)	R$155.33	R$129.90 - R$155.33	0
	Gadus morhua	R$199.90	R$199.90	0

Table 4. Median price and regional variation by region for cod loin.

Region	Current Week Price	% Change vs. Previous Week
North	R$216.50	0
Northeast	R$176.06	0.15
Central-West	R$172.05	2.47
Southeast	R$181.24	1.60
South	R$186.23	0

Tilapia

Tilapia showed a slight increase in frozen fillets, rising 1.96% compared to the previous week. The central price range stood between R$48.62/kg and R$67.97/kg, indicating a moderate recovery at the national level.

The main highlight, however, is the regional behavior. The South recorded a decline of 12.44%, while the North increased by 12.82%. This difference reinforces that the category remains highly sensitive to local dynamics of supply, logistics, and competition among retail chains.

One point to monitor is the gradual entry of imported frozen tilapia fillets from Vietnam, particularly through the ports of Itajaí and Santos. This increase in supply may be contributing to greater competitive pressure on prices in some regions, especially in the South and Southeast, although it is still too early to establish a direct relationship.

Table 5. Price Indicators – Tilapia Fillet.

Presentation	Current Week Price	Minimum and Maximum Prices	% Change vs. Previous Week
Frozen Fillet	R$62.37	R$48,62 - R$67,97	1.69
Breaded Frozen Fillet	R$85.75	R$67,25- R$97,25	0

Table 6. Median price and regional variation by region for tilapia fillet.

Region	Current Week Price	% Change vs. Previous Week
North	R$69.81	12.82
Northeast	R$67.72	0.41
Central-West	R$72.22	0.00
Southeast	R$62.37	2.05
South	R$53.61	-12.44

PREPARED BY:

JUBART DATA

Week 18 reinforces that the fish market remains in a phase of selective adjustments. Tilapia showed significant regional contrasts, with possible additional pressure from the entry of Vietnamese products through strategic ports. Salmon maintained stability in fillets, but with price recovery in whole formats. Cod showed greater presence in the monitored base, with movements concentrated in specific species.

For buyers, distributors, and suppliers, the key takeaway is that final retail prices increasingly depend on the combination of supply, logistics, product origin, region, and retail strategies. Weekly monitoring makes it possible to identify these signals before they become more broadly visible in the market.
