JUBART DATA

Weekly Report

#Week 17

National Fish Observatory

INTRODUCTION

Week 17 (April 20–26, 2026) shows the fish retail market in a phase of adjustment following the period of greater seasonal pressure during Holy Week. Overall, the market does not indicate a widespread increase in prices, but rather selective adjustments by species, product format, and region. This behavior reinforces the importance of analyzing the market beyond the national median: for some products, aggregated stability coexists with significant changes in specific formats and distinct regional strategies.

In this edition, JubartData's monitoring tracks tilapia, salmon, and cod based on a broad dataset of records from the Brazilian retail sector. The highlight of the week lies in the combination of stability in high-turnover items, targeted price recovery in processed or higher value-added products, and a significant drop in certain salmon product formats.

Salmon

With 7,338 samples collected across 436 stores, salmon monitoring maintained a robust dataset during the week. Salmon showed the most significant movement among the monitored species. Frozen fillets recorded a slight decrease of 0.91%, while fresh fillets declined by 3.51% over the week. Whole fresh salmon experienced a more pronounced drop, with a 9.56% reduction. This pattern may indicate greater retail sensitivity in products with higher logistical demands, perishability, and the need for faster turnover.

Table 1. Price Indicators – Whole and Filleted Salmon.

Presentation	Preservation	Current Week Price	P25 -P75	% Change vs. Previous Week
Whole	Frozen	R$54.99	R$54.99 - R$62.90	0
	Fresh	R$61.49	R$59.90 - R$69.99	-9.56
Fillet	Frozen	R$121.25	R$109.87 - R$143.61	-0.91
	Fresh	R$104.90	R$89.90 - R$189.90	-3.51

The regional breakdown of fresh fillet prices shows the highest levels in the North and Central-West, exceeding R$136/kg, while the lowest median price was observed in the South at R$108.98/kg. This reinforces that salmon remains a category with strong regional differentiation, driven both by logistics and by retailers' commercial positioning strategies.

Table 2. Median price and regional variation of salmon fillet.

Region	Current Week Price	% Change vs. Previous Week
North	R$136.79	0
Northeast	R$131.24	-3.68
Central-West	R$136.17	-0.27
Southeast	R$119.80	0
South	R$108.98	0

Cod

Cod maintained a fragmented behavior, typical of the category, with significant differences by species and product format. In loin cuts, the highest median price was observed for Pacific cod. In the butterflied presentation, generic cod stood out with a significant increase of 19.58%. On the other hand, Saithe declined by 9.09%, remaining a lower-priced alternative within the category. Following Holy Week, cod appears to be entering a phase of selective price recomposition, less driven by overall demand pressure and more linked to product mix, available species, and retailers' pricing strategies.

Table 3. Price Indicators – Cod Loin and Split Cod.

Presentation	Preservation	Current Week Price	P25 -P75	% Change vs. Previous Week
Loin	Saithe - *Pollachius virens*	R$114.49	R$ 96.74 - R$ 132.24	0
	Cod (Generic)	R$179.78	R$163.24 - R$192.40	2.26
	Gadus morhua	R$231.24	R$224.88 - R$243.74	0
	Pacific Cod - *Gadus macrocephalus*	R$279.90	R$264.90 - R$279.90	0
Split	Saithe - *Pollachius virens*	R$59.99	R$59.99 - R$62.99	-9.09
	Zarbo - *Brosme brosme*	R$79.90	R$79.90	0
	Pacific Cod - *Gadus macrocephalus*	R$84.89	R$84.89	0
	Ling - *Molva molva*	R$99.90	R$99.90	0
	Cod (Generic)	R$155.33	R$129.9 - R$155.33	19.58
	Gadus morhua	R$199.90	R$199.90	0

Table 4. Median price and regional variation by region for cod loin.

Region	Current Week Price	% Change vs. Previous Week
North	R$216.50	0
Northeast	R$175.80	-2.21
Central-West	R$167.90	0
Southeast	R$178.39	2.01
South	R$186.23	0.36

Tilapia

With 15,514 samples collected across 436 stores, tilapia monitoring maintained a robust dataset during the week.

Tilapia showed a stable trend in frozen fillets, the main reference product in the category. The most notable movement was observed in frozen breaded fillets, which increased by 4.83% over the week. The price gap of R$24.58/kg compared to frozen fillets reinforces the premium positioning of more processed, convenience-oriented, and higher value-added products.

Regionally, frozen fillets experienced greater upward pressure in the Central-West, where the median reached R$72.22/kg, up 2.87%. The lowest level was observed in the Southeast, at R$61.12/kg. Overall, the data suggest a nationally stable category, yet still marked by significant regional differences in pricing and supply.

Table 5. Price Indicators – Tilapia Fillet.

Presentation	Current Week Price	Minimum and Maximum Prices	% Change vs. Previous Week
Frozen Fillet	R$61.17	R$48.62 - R$71.73	-0.09
Breaded Frozen Fillet	R$85.75	R$66.25 - R$97.25	4.83

Table 6. Median price and regional variation by region for tilapia fillet.

Region	Current Week Price	% Change vs. Previous Week
North	R$61.88	-2.56
Northeast	R$62.47	2.03
Central-West	R$72.22	2.87
Southeast	R$61.12	-0.17
South	R$61.22	0

PREPARED BY:

JUBART DATA

The Week 16 analysis confirms that the post-Easter period does not simply represent an automatic return to stability. On the contrary: it is a period in which retail begins to expose, with greater transparency, its internal differences in strategy, turnover, and positioning. Tilapia already signals a more evident adjustment, salmon reveals a segmented market between presentations, and cod, although still valued, begins to show signs of selective accommodation.

It is precisely in this type of week that granular monitoring becomes more valuable for decision-makers. More than tracking national averages, detailed analysis by species, cut, and region allows identifying where the price is falling, where it remains supported, and where the first signs of competitive repositioning are emerging. This is the central role of JubartData's weekly report: to transform data dispersion into practical market analysis.
