JUBART DATA

Weekly Report

#Week 15

National Fish Observatory

INTRODUCTION

Week 15 marked the first readout of the seafood retail market after Easter, one of the most sensitive periods in the category's commercial calendar. This window is particularly revealing because it allows us to observe how the market behaves after the seasonal peak: whether prices stabilize, assortment contracts, positioning is maintained, or early signs of competitive rebalancing begin to emerge.

In this edition, the data show that the post-holiday period did not generate a uniform movement across the monitored species. Tilapia, salmon, and cod followed distinct trajectories, reflecting different pricing, assortment, and in-store presence strategies. It is precisely during this transition phase that granular monitoring becomes most valuable, making it possible to distinguish what is merely a calendar effect from what may already be interpreted as a retail commercial repositioning.

Salmon

For salmon, the first week after Easter was characterized by mixed behavior, with no generalized price normalization across the category. The main highlight was fresh fillet, which increased by +11.21%, alongside gains in whole frozen salmon, up +7.27%.

Regionally, the main benchmark pointed to a relatively fragmented market: the Midwest recorded the highest median at BRL 136.54/kg, while the South showed the lowest level at BRL 108.98/kg. On a week-over-week basis, the strongest increase was observed in the Northeast (+5.83%), whereas the North was the only region to post a decline (-0.86%).

Table 1. Price Indicators – Whole and Filleted Salmon.

Presentation	Preservation	Current Week Price	P25 -P75	% Change vs. Previous Week
Whole	Frozen	R$58.99	R$54.99 - R$68.23	7.27
	Fresh	R$58.90	R$54.90 - R$69.99	-3.54
Fillet	Frozen	R$119.80	R$111.20 - R$144.98	0.15
	Fresh	R$109.99	R$84.90 - R$189.90	11.21

Table 2. Median price and regional variation of salmon fillet.

Region	Current Week Price	% Change vs. Previous Week
North	R$135.84	-0.86
Northeast	R$136.25	5.83
Central-West	R$136.54	4.36
Southeast	R$119.80	0
South	R$108.98	2.85

Cod

For cod, the post-Easter period brought the clearest sign of operational contraction among the monitored species. The sample base declined to 5,336 observations (-21.39% WoW), accompanied by a reduction in the number of stores (380, or -4.52%) and in the median assortment per store (2.0 SKUs, -33.33%).
Following the category's most important consumption date of the year, retailers reduced shelf exposure, simplified the product mix, and shifted to a leaner in-store presence.

Table 3. Price Indicators – Cod Loin and Split Cod.

Presentation	Preservation	Current Week Price	P25 -P75	% Change vs. Previous Week
Loin	Saithe - *Pollachius virens*	R$114.49	R$ 96.74 - R$ 132.24	44.94
	Cod (Generic)	R$178.89	R$166.39 - R$193.62	6.02
	Gadus morhua	R$231.24	R$231.24 - R$249.88	0
	Pacific Cod - *Gadus macrocephalus*	R$279.90	R$279.90	7.70
Split	Saithe - *Pollachius virens*	R$59.90	R$59.90 - R$59.92	0
	Zarbo - *Brosme brosme*	R$79.90	R$79.90	0
	Pacific Cod - *Gadus macrocephalus*	R$84.89	R$84.89	0
	Ling - *Molva molva*	R$99.90	R$99.90	0
	Cod (Generic)	R$129.90	R$129.90	0
	Gadus morhua	R$199.90	R$199.90	0

Table 4. Median price and regional variation by region for cod loin.

Region	Current Week Price	% Change vs. Previous Week
North	R$216.50	-34.39
Northeast	R$179.78	1.26
Central-West	R$187.38	14.52
Southeast	R$174.88	4.16
South	R$186.90	6.03

Tilapia

For tilapia, the first week after Easter showed a moderate price recovery movement. The median price of frozen fillet increased by +4.29% versus the previous week, while breaded frozen fillet remained stable. The key takeaway here is that, after the category's main seasonal date, tilapia did not enter a weakening cycle; on the contrary, it demonstrated the ability to sustain and even rebuild pricing in a core retail format.

Regionally, the behavior was heterogeneous: the highest median price for frozen fillet was recorded in the Midwest at BRL 69.98/kg, while the lowest was observed in the Northeast at BRL 59.98/kg. On a week-over-week basis, the strongest increase came from the South (+6.52%), followed by the Southeast (+5.94%), while the North posted a sharp decline (-35.16%), diverging from the rest of the country.

Table 5. Price Indicators – Tilapia Fillet.

Presentation	Current Week Price	Minimum and Maximum Prices	% Change vs. Previous Week
Frozen Fillet	R$63.74	R$49.25 - R$73.39	4.29
Breaded Frozen Fillet	R$81.80	R$66.25 - R$97.25	0

Table 6. Median price and regional variation by region for tilapia fillet.

Region	Current Week Price	% Change vs. Previous Week
North	R$64.83	-35.16
Northeast	R$59.98	0.02
Central-West	R$69.98	4.06
Southeast	R$64.75	5.94
South	R$61.22	6.52

PREPARED BY:

JUBART DATA

The integrated reading of Week 15 shows that the post-Easter period was not merely a moment of stabilization, but rather a phase of strategic reorganization within seafood retail. Salmon showed a selective recovery in higher value-added items, tilapia sustained its presence and expanded in its leading format, while cod sharply reduced both its store base and assortment without triggering a generalized price decline. The market therefore emerged from the seasonal peak still active, but with differentiated responses depending on species, product format, and region.

For decision-makers, this is the key value of this week's reading: understanding that the end of the promotional calendar does not mark the end of competitive movement—it simply changes its form. It is in the post-holiday period that it becomes clearer which categories are able to sustain pricing, which retailers streamline their assortment, which regions begin to rebuild margins, and where the first signs of a new commercial positioning start to emerge. In an increasingly fragmented and responsive retail environment, tracking this level of detail is what allows observed prices to be translated into applied market intelligence.
