JUBART DATA

Weekly Report

#Week 14

National Fish Observatory

INTRODUCTION

During Holy Week, the Brazilian fish retail market remained active, but without a single unified price movement across the main monitored categories. Rather than a widespread increase, the data reveal a more selective environment, in which each species responded differently to the consumption period. Cod maintained high price levels in the more premium species and showed important regional adjustments; salmon operated with occasional easing in relevant cuts; and tilapia remained stable overall, although with significant differences across regions. Taken together, the week's picture reinforces that the seasonal calendar matters, but it does not override the competitive logic unique to each market.

Salmon

For salmon, the week's reading pointed to a selective adjustment, with no generalized upward price pressure even during one of the most relevant periods in the fish consumption calendar. Frozen fillets declined by 2.09%, and whole fresh salmon fell by 3.76%, while fresh fillets remained stable. Regionally, the Southeast increased by 1.61%, whereas the Northeast and Midwest declined, suggesting that retailers managed salmon with greater precision in product mix, conversion, and market positioning by region, rather than simply passing through a uniform seasonal pressure.

Table 1. Price Indicators – Whole and Filleted Salmon.

Presentation	Preservation	Current Week Price	P25 -P75	% Change vs. Previous Week
Whole	Frozen	R$54.99	R$54.73 - R$62.90	0
	Fresh	R$61.06	R$59.90 - R$66.74	-3.76
Fillet	Frozen	R$119.80	R$112.69 - R$141.68	-2.09
	Fresh	R$98.90	R$89.99 - R$189.90	0

Table 2. Median price and regional variation of salmon fillet.

Region	Current Week Price	% Change vs. Previous Week
North	R$137.01	0
Northeast	R$128.74	-5.33
Central-West	R$130.84	-3.65
Southeast	R$119.80	1.61
South	R$105.96	-0.16

Cod

Cod, in turn, entered Holy Week sustaining value across its more established species and cuts. In the regional reading of the generic loin cut, the South, Southeast, and Northeast posted gains, while the Midwest declined, showing that even during the category's most important commercial week, price behavior remained shaped by regional strategies for turnover, positioning, and demand capture.

Table 3. Price Indicators – Cod Loin and Split Cod.

Presentation	Preservation	Current Week Price	P25 -P75	% Change vs. Previous Week
Loin	Saithe - *Pollachius virens*	R$78.99	R$ 78.99 - R$ 93.99	0
	Cod (Generic)	R$168.74	R$153.69 - R$188.20	0.50
	Gadus morhua	R$231.24	R$199.88 - R$243.74	0
	Pacific Cod - *Gadus macrocephalus*	R$259.90	R$229.90 - R$259.90	0
Split	Saithe - *Pollachius virens*	R$59.90	R$59.99	-14.42
	Zarbo - *Brosme brosme*	R$79.90	R$79.90	0
	Pacific Cod - *Gadus macrocephalus*	R$84.89	R$84.89	0
	Ling - *Molva molva*	R$99.90	R$99.90	0
	Cod (Generic)	R$129.90	R$129.90	0
	Gadus morhua	R$199.90	R$199.90	0

Table 4. Median price and regional variation by region for cod loin.

Region	Current Week Price	% Change vs. Previous Week
North	R$329.99	0.76
Northeast	R$177.55	0
Central-West	R$163.62	-7.85
Southeast	R$167.90	2.60
South	R$176.27	5.87

Tilapia

Tilapia showed the most stable picture among the monitored species. Even so, national stability does not eliminate important regional differences: the Southeast declined by 2.95% and the South by 4.16%, while the North, Northeast, and Midwest remained stable. The North continued to post the highest median price in the country, at R$99.98/kg, compared with R$57.47/kg in the South.

Table 5. Price Indicators – Tilapia Fillet.

Presentation	Current Week Price	Minimum and Maximum Prices	% Change vs. Previous Week
Frozen Fillet	R$61.12	R$49.82 - R$68.78	0
Breaded Frozen Fillet	R$81.80	R$66.25 - R$97.25	0

Table 6. Median price and regional variation by region for tilapia fillet.

Region	Current Week Price	% Change vs. Previous Week
North	R$99.98	0
Northeast	R$59.97	0
Central-West	R$67.25	0
Southeast	R$61.12	-2.95
South	R$57.47	-4.16

PREPARED BY:

JUBART DATA

In summary, Holy Week confirmed that the fish market cannot be interpreted solely through the lens of the calendar. The seasonal period increases attention on the category, but the data show that price formation continues to be strongly influenced by species, product format, price tier, and regional dynamics. For retailers, industry players, and distributors, this week's key message is clear: more than simply tracking national averages, it is essential to observe with granularity where value is being sustained, where competitive adjustments are taking place, and where consumption is being more intensely contested. It is precisely this refined reading that transforms price monitoring into true market intelligence.
